

# HONEYWELL COMBUSTION SAFETY

## Safety Testing & Inspections

Honeywell Combustion Safety offers the most comprehensive, consistent and disciplined third-party combustion system inspection and testing program in the industry.

### Safety Testing

Our firm has tested over 30,000 combustion systems that covers more than 105 engineering issues, code required safety interlock, and valve leak testing. Honeywell Combustion Safety has developed over 30 proprietary checklists for each different type of equipment, evaluating over 140+ points per checklist.

### Engineering Assessment

Honeywell Combustion Safety utilizes proprietary checklists that screen each fuel delivery system and piece of equipment against the following six distinct criteria:

1. Code Compliance
2. Operational Issues
3. Maintenance Issues
4. Installation Issues
5. Technological Advances/Best Practices
6. Training Deficiencies

### SafeView Reporting

Honeywell Combustion Safety's exclusive online database SafeView provides managers with immediate access to every identified and ranked safety issue to begin tracking repair progress across all sites of their organization.

### System Design and Support

Our licensed professional engineers can troubleshoot burner management systems, diagnose problem light offs or operational issues, document missing or altered wiring schematics, analyze and test emissions, perform calibrations, document proper set points, and much more.

## World Leader in Combustion Safety Services

With 30 years of industry experience, Honeywell Combustion Safety, formerly known as CEC Combustion Safety, is the world leader in managing and mitigating combustion equipment and fuel gas piping risk exposure. The company provides expert testing, inspection, training and engineering services for all types of fuel-fired systems across numerous industries throughout the world.

## National Code Committee Member

- NFPA 85 - Boilers greater than 12.5 MM BTU/HR
- NFPA 86 - Furnaces & Ovens
- NFPA 87 - Fluid Heaters
- NFPA 56 - Standard for fire & explosion prevention during cleaning & purging of flammable gas piping systems

## Facts and Figures

- Global service, engineering & upgrade capabilities
- Domain expertise with all types of fuel-fired systems across numerous industries
- 30,000+ fuel-fired systems inspected and safety tested
- SafeView - A unique online reporting system featuring a dashboard that trends and tracks issues, and empowers proactive decisions across one to 100+ facilities and thousands of fuel-fired systems
- Corporate-wide creation, implementation and management of safety programs
- Thousands trained annually with client-specific hazards, live-fire demos and online training
- Proven safety services to increase safety, reduce costs and increase reliability, efficiencies, and competitiveness while ensuring facility capacity
